

PREPARATION OF YOUR GALILEO WEATHER STATION™

Carefully remove shipping cap (**best to cut side of cap first**) from barometer tube with slight twisting motion. Cap is identified with tag. It is best to remove cap over bathtub or kitchen sink because colored fluid may squirt due to current low atmospheric pressure or altitude. Allow time for liquid to settle. Some agitation of liquid in the barometer tube may occur during shipping. To remove bubbles, use "Pipet Tube" as supplied. Submerge "Pipet Tube" in water (distilled water recommended) and fill by squeezing tube. Over a kitchen sink, insert "Pipet" into top of barometer tube and squeeze, forcing water into barometer tube (you may have to squeeze "Pipet" 2-3 times). Bubbles will disappear and your barometer is set. Changes in barometric pressure will cause the fluid to rise and fall. If over time you experience evaporation, refill barometer reservoir using a pre-mixed solution composed of distilled water and food coloring. Inject fluid using the same procedure as above. Fill to level no higher than top of Hygrometer.

How Do I Tell the Temperature?

Read the temperature tag on the lowest floating sphere in the top grouping.

Precautions

The liquid in the thermometer portion is completely sealed and can be safely displayed in your home. By following a few basic guidelines, you can enjoy this product for a lifetime. Keep out of reach of small children and pets. Place on a level surface where accidental tipping cannot occur. Keep away from sources of heat such as, fireplaces, stoves and radiators. Do not store in your automobile trunk. Keep out of direct sunlight.

This product contains paraffin (petroleum distillates), which is found in many household products. The same safety precautions apply.

Should breakage occur, keep away from open flames.
Fluid in this product is combustible. Be careful when picking up glass pieces or fragments, they may be sharp. Open all windows to increase ventilation and wipe up excess with damp cloth. Rinse remaining residue from cloth and allow drying outdoors. Thoroughly wash hands with soap and water. If eye contact occurs, flush eye with water for a least five minutes and contact physician.

Do not take internally. Harmful or fatal if swallowed. If swallowed, **DO NOT INDUCE VOMITING. ASPIRATION HAZARD.** Immediately call physician or Poison Control Center at 1-800-876-4766. Refer to following product identifiers # CAS 64742-48-9 and # CAS 00112-34-5. 3%
